

CLAIMS

1. A panel for a solar rail or railing system, comprising:
  - first and second transparent or, at least, translucent tempered glass panels;
  - an array of solar cells spaced from but connected to each other on a
- 5 transparent or, at least, translucent film sandwiched between the glass panels;
  - a bottom rail for supporting the sandwich of film and glass panels from a portion of a building; and
  - a top rail for an outlet conduit of the electrical connection of the solar cells.
2. The panel according to claim 1, and another thereof with the bottom and top
- 10 rails respectively connected to each other as bottom and top rail elements.
3. The panel according to claim 1, wherein the top rail forms a handrail.
4. The panel according to claim 2, wherein the top rail element forms a handrail.
5. The panel according to claim 1, wherein the outlet conduit of the top rail is electrically connected to the building.
- 15 6. The panel according to claim 2, wherein the outlet conduit of the top rail is electrically connected to the building.
7. The panel according to claim 3, wherein the outlet conduit of the top rail is electrically connected to the building.
8. The panel according to claim 4, wherein the outlet conduit of the top rail is electrically connected to the building.
